User Stories

AUTHENTICATION & SECURITY

US-01	Student	I want to register using email and password so that I can securely access the platform.	• User must enter name, email, password • Password must be minimum 8 characters • Password is encrypted using crypts
US-02	student	I want secure login validation so that unauthorized access is prevented.	• Google authentication popup appears • OAuth token validated by backend • JWT generated after verification
US-03	student	I want secure login validation so that unauthorized access is prevented.	• Email and password validated • Incorrect credentials show error message • JWT issued upon successful login
US-04	Student	I want to reset my password so that I can regain account access.	• Reset link sent to registered email • Token expires after fixed duration • Password updated securely
US-05	Admin	I want role-based access so that system permissions are controlled.	• Roles: Student, Mentor, Admin • Unauthorized role access restricted • Middleware verifies user role

SOFT SKILL REELS
